An overview over HIV related activities

AIDS in Eastern Europe

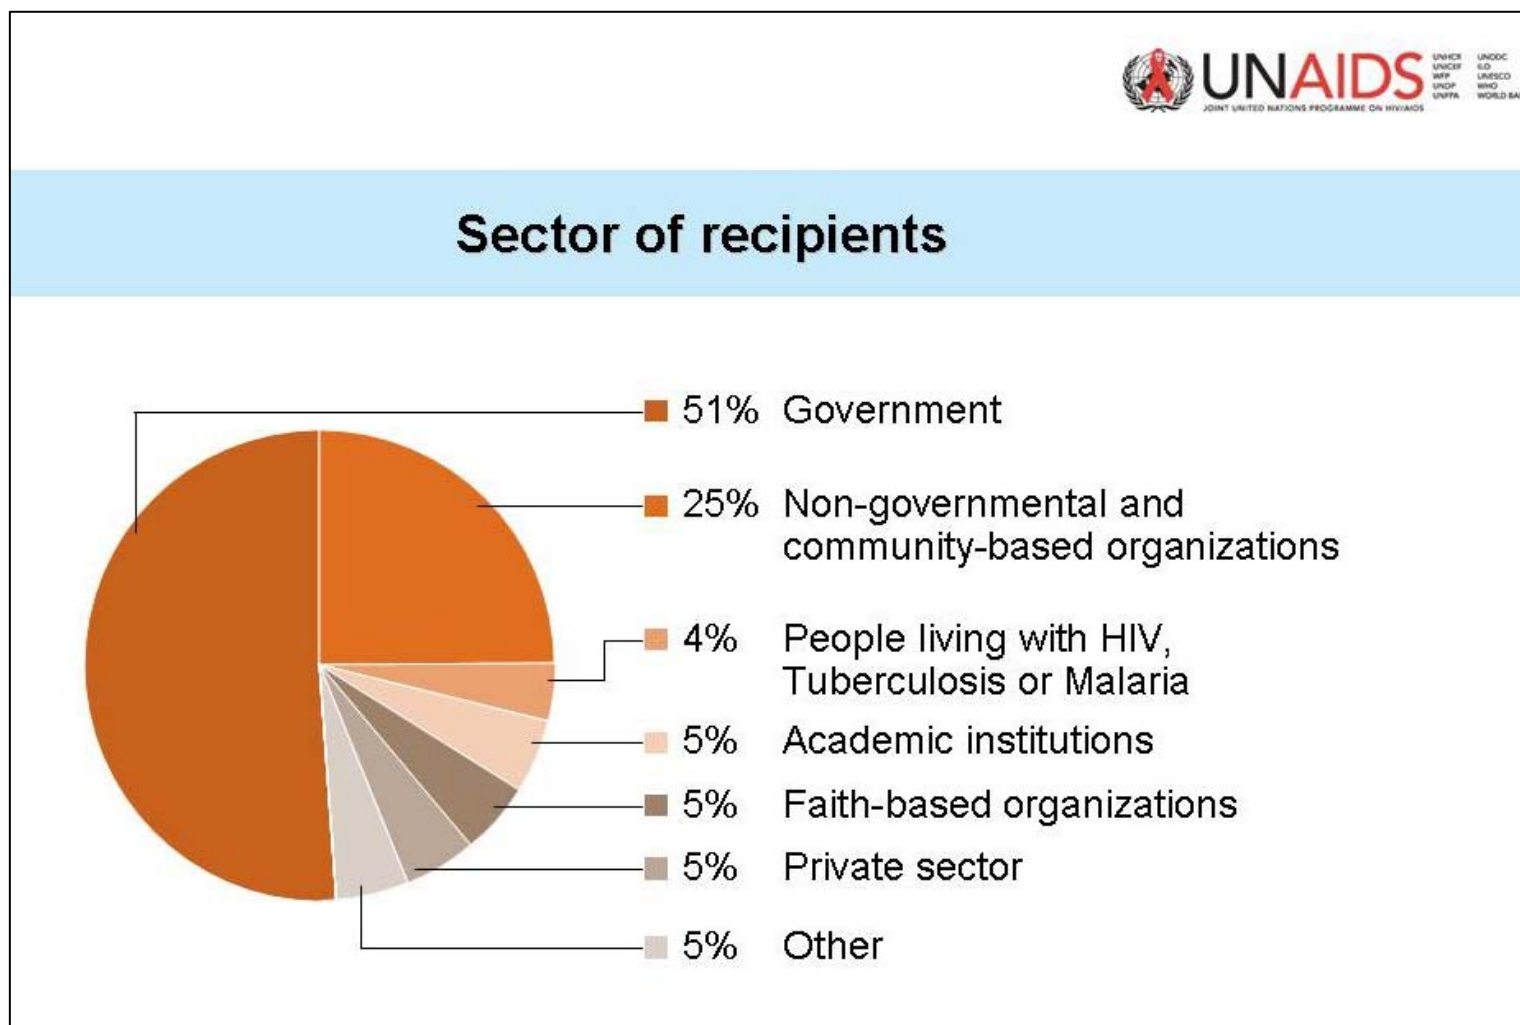

The Role of Faith-Based Organisations

**On average,
40 % of health care
in Africa
is provided by
faith-based organisations.**

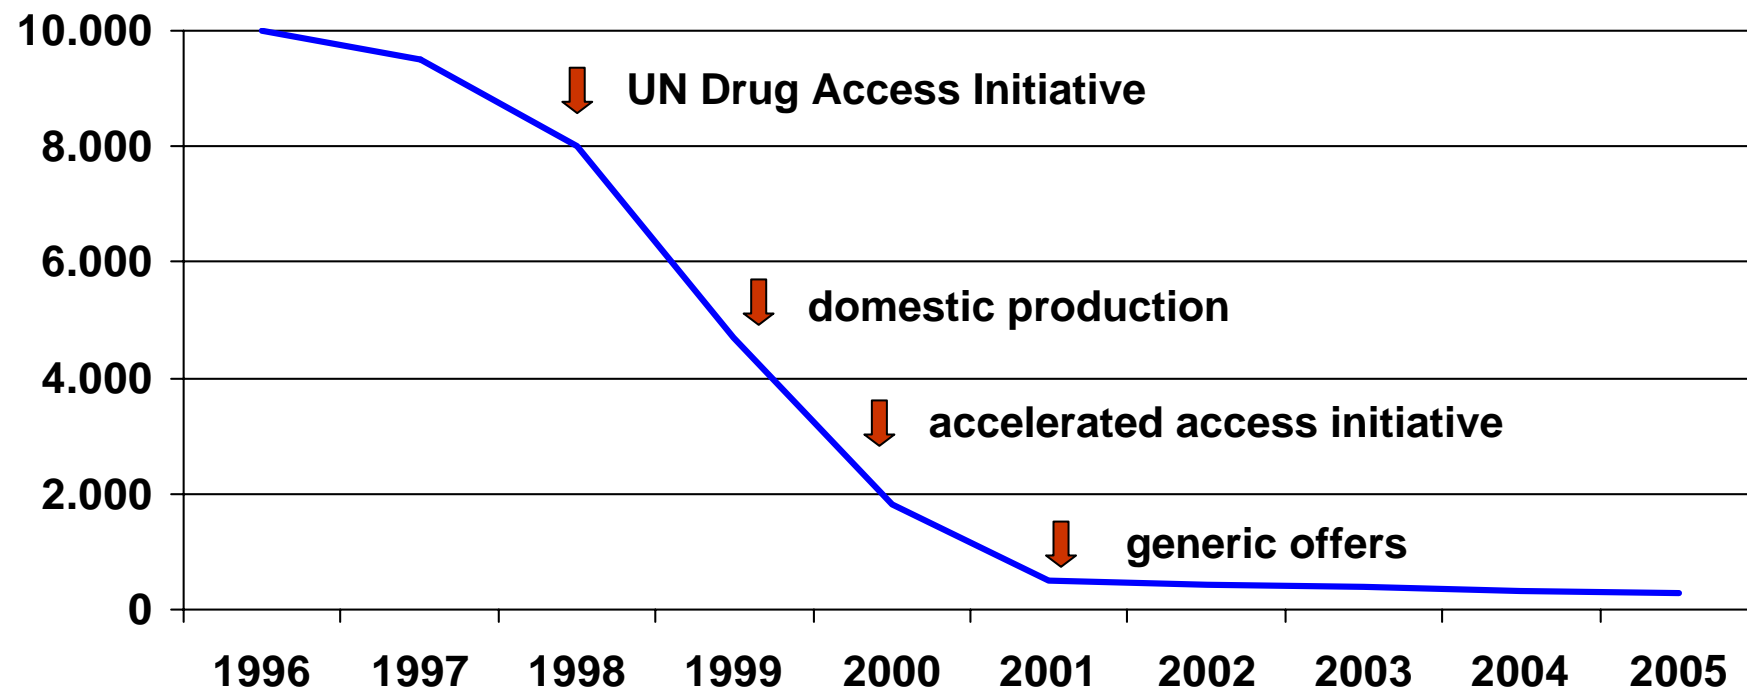

The Role of Faith-Based Organisations

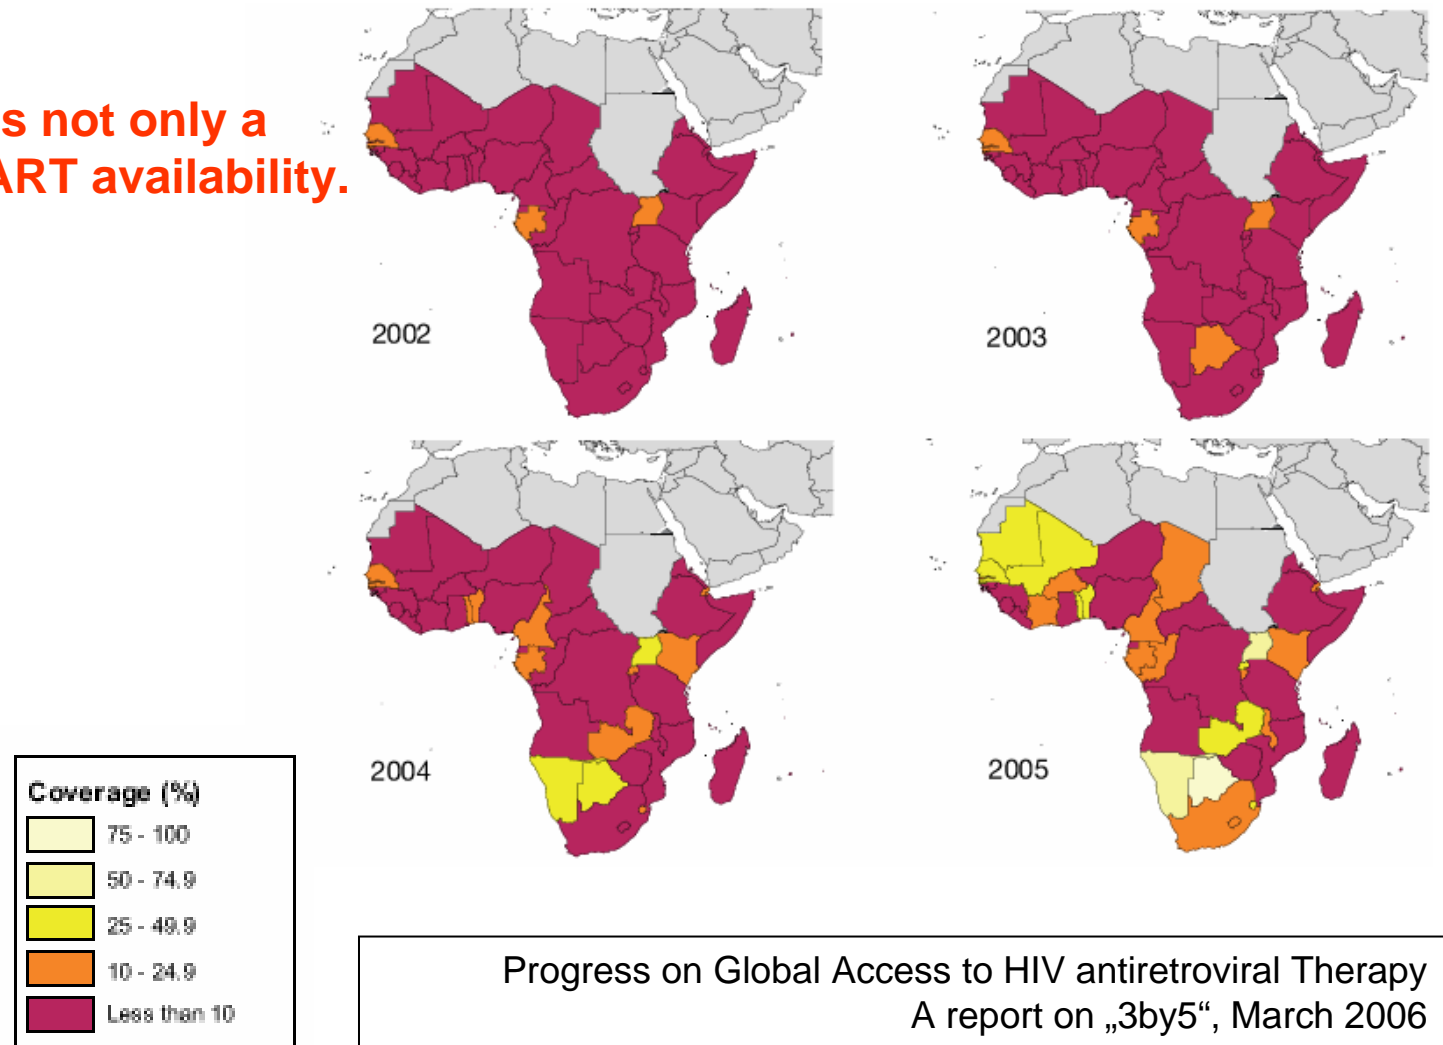

ART in Resource-Poor Settings

US \$ per capita and year

2007 – Draw Backs in HIV Control

1. HIV control is not only a problem of ART availability.

2007 – Draw Backs in HIV Control

1. **HIV control is not only a problem of ART availability.**

- prepare adherence
- assure reliable drug production
- monitor ART success rates

2007 – Draw Backs in HIV Control

1. HIV control is not only a problem of ART availability.
2. HIV control is more and more perceived as a technical challenge, leaving out the "human factor".

Patients have to be perceived in their social and cultural context.

2007 – Draw Backs in HIV Control

1. HIV control is not only a problem of ART availability.
2. HIV control is more and more perceived as a technical challenge, leaving out the "human factor".
3. **Availability of appropriate laboratory facilities does not match the needs.**

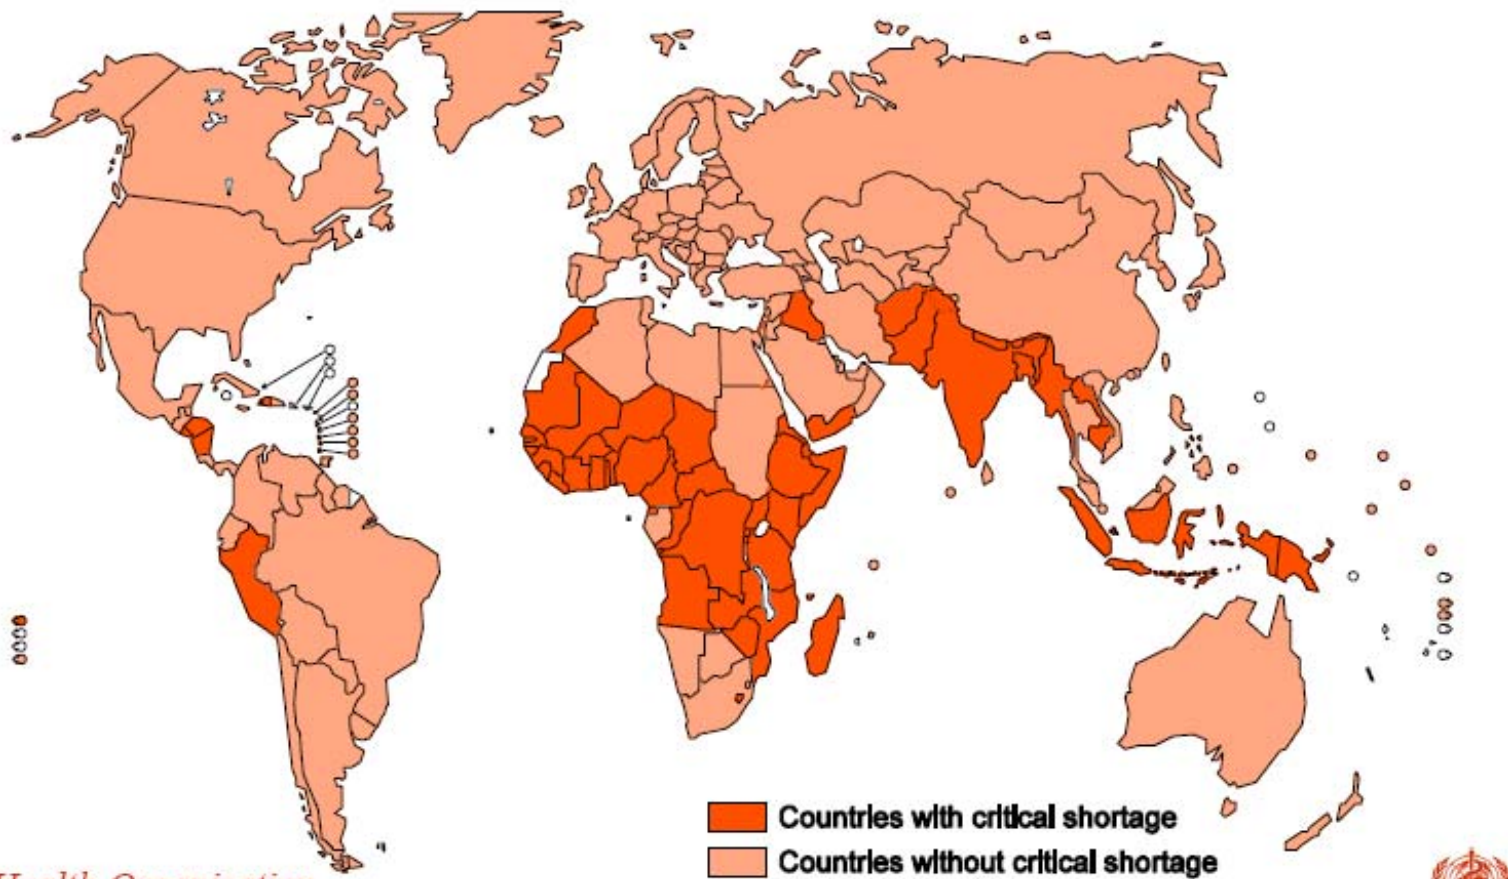

- support clinical diagnostic approaches
- open laboratory systems with appropriate technologies

2007 – Draw Backs in HIV Control

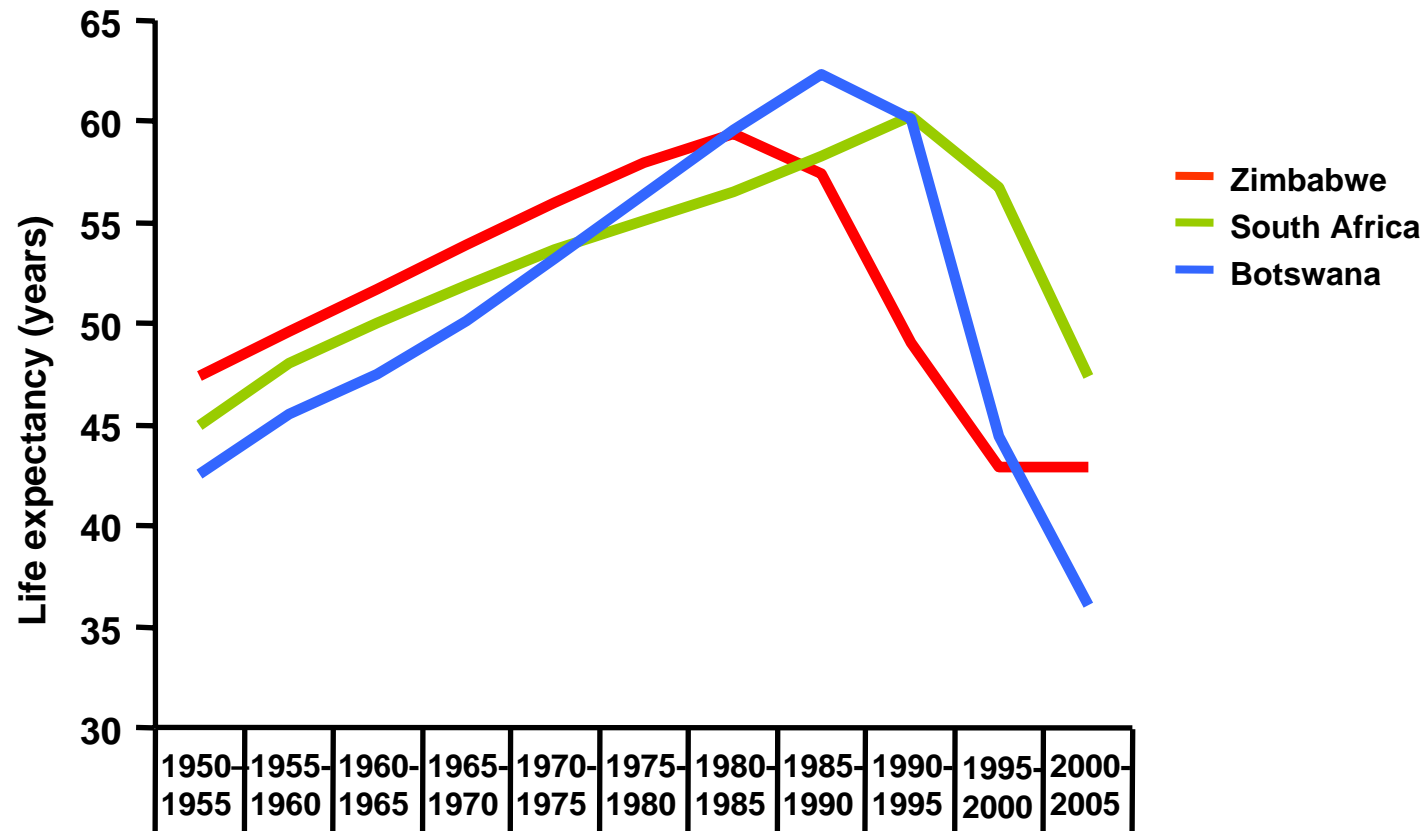

1. HIV control is not only a problem of ART availability.
2. HIV control is more and more perceived as a technical challenge, leaving out the "human factor".
3. Availability of appropriate laboratory facilities does not match the needs.
4. **Health services in low resource settings are not sufficiently capable to manage a scaling-up.**

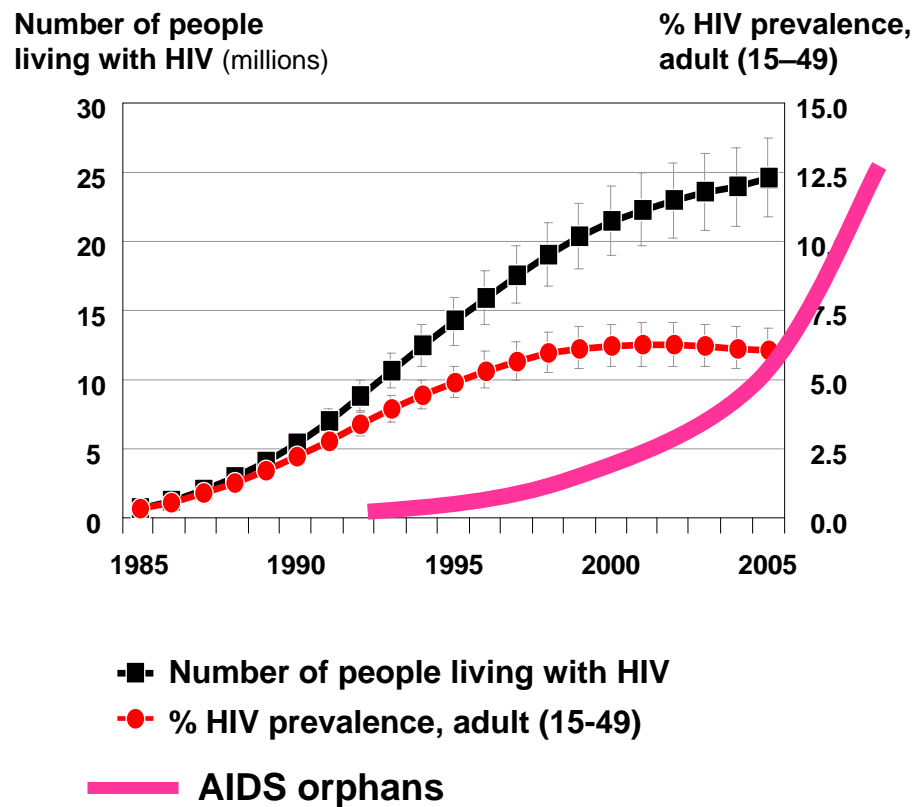

Critical shortage of health service providers (doctors, nurses and midwives)
